

Calf/Fawn Inventory

White-tailed deer must be officially identified before October 31 of the year in which they were born, at the time of weaning or before movement from the premises, whichever comes first. All other Cervidae must be officially identified before December 31 of the year in which the animal is born, at the time of weaning or before movement from the premises, whichever occurs first. (MN Stat. 35.155 Subd. 6.(a)). This inventory is to be submitted to the Board of Animal Health by January 31 the following year, annually.
